DON'T ATTACK IRAN

We are at extremely concerned at reports that plans are being drawn up for an attack on Iran. The case being made for war on Iran is based on a series of vague speculations. The issue of nuclear weapons is being used as a pretext for action just as weapons of mass destruction were over Iraq. The wars in Afghanistan and Iraq have had disastrous consequences including the deaths of hundreds of thousands of civilians and the displacement of millions. Any attack on Iran would risk a wave of destruction across the region. Plans for an attack along with sanctions against Iran should be scrapped immediately. The British government should not allow its base in Diego Garcia to be used for strikes against Iran.
